In this game, players have two options: killers and runners, they have

different targets runners have to run to the end of the map alive, and the killer is essential in that it is not, don't let them do their traps everywhere. Run through beautiful worlds, jump on platforms and pass or set traps that should fall on your victim. Take your chance to bless aces that enemies can't catch you, either you're running away from the role you've chosen based on your choice. DeathRun Portable - multiplayer for mobile devices on the platform Android. The game is already connected to one of the two warring parties. A significant difference with other shooters is that the team before the fight is on platforms separated by a chasm, and the cards themselves contain a lot of interesting traps that should be used to eliminate enemy forces. It is necessary to enable traps. Players must have access to the final position, where the keys remove the platform or bridge on which to move. Controls are typical for devices on portable touchscreen devices. The virtual stick is responsible for movement and buttons for attacks and jumps. Turning must also be swiped through. The graphics aren't the most prominent, but it doesn't stop exciting gaming. But the animation movement of the characters is quite realistic. The soundtrack itself is missing, there are only sound effects of footprints and bumps. DeathRun Portable - an entertaining action game that satisfies fans of online battles.
